

Trails, Bikeways & Parks Guide

On-street Bikeways

Recommended bike routes within the street pavement designated based on novice rider's comfort level and ease of use.

- Comfortable**
Routes with low vehicle volume and lower speeds, generally residential, or streets with wide lanes. These routes may be designated with signs, marked bike lanes, or shared lanes.
- Moderate**
Routes with low to moderate traffic volumes and/or speeds with varying lane widths. May include bike lanes or wide shoulders on higher volume roads.
- Difficult**
Routes with faster vehicular speeds and/or volume, combined with narrow lane widths or busy intersections. Use caution in these areas.

Shared Use Paved Trail

- 10 or 12 foot wide paved surface separate from the streets. High comfort level and ease of use.
- 10 or 12 foot wide paved surface with (year of expected completion).
- Razorback Regional Greenway

Single Track Mountain Bike & Hiking Trail

- Approximately 5 foot wide natural surface trails. Not suitable for all weather conditions; please do not ride on wet trails, doing so may damage the trail. This map does not show hill grades on these trails.

Steep Grades

- Arrow points uphill direction and does not designate direction of travel. Frequency roughly indicates steepness of grade.
